Introduction

Overview

Goldman Sachs International Bank Johannesburg Branch (the branch) is a branch of Goldman Sachs International Bank (the head office) and is incorporated and domiciled in the Republic of South Africa.

Goldman Sachs International Bank (GSIB) is a UKdomiciled bank involved in lending and deposit-taking activities, securities lending, and a primary dealer for UK government bonds.

The branch's ultimate parent undertaking and controlling entity is The Goldman Sachs Group, Inc. (Group Inc.), a Delaware corporation, which together with its consolidated subsidiaries (collectively, the firm), is a leading global financial institution that delivers a broad range of financial services to a large and diversified client base that includes corporations, financial institutions, governments and individuals. When we use the terms "Goldman Sachs" and "the firm", we mean Group Inc. and its consolidated subsidiaries and when we use the terms "GSIBJB", "the branch", "we", "us" and "our", we mean Goldman Sachs International Bank Johannesburg Branch.

The Board of Governors of the Federal Reserve System is the primary regulator of Group Inc., a bank holding company (BHC) under the U.S. Bank Holding Company Act of 1956 and a financial holding company under amendments to this Act. The firm is subject to consolidated regulatory capital requirements which are calculated in accordance with the regulations of the Federal Reserve System (Capital Framework).

The capital requirements are expressed as risk-based capital and leverage ratios that compare measures of regulatory capital to risk-weighted assets (RWAs), on and off-balancesheet exposures. Failure to comply with these capital requirements could result in restrictions being imposed by our regulators and could limit our ability to repurchase shares, pay dividends and make certain discretionary compensation payments. The branch's capital levels are also subject to qualitative judgements by the regulators about components of capital, risk weightings and other factors.

For information on Group Inc.'s financial statements and regulatory capital ratios, please refer to the firm's most recent Quarterly Pillar 3 Disclosures and Quarterly Report on Form 10-Q. References to the "Quarterly Report on Form 10-Q" are to the firm's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2025.

This quarterly disclosure for the branch has been prepared for the three-month period ended March 31, 2025, in line with the accounting reference date for GSIB. All references to March 2025 refer to the three-month period ended thereof, or the date, as the context requires, March 31, 2025.

The branch is supervised by the Prudential Authority (PA) of the South African Reserve Bank (SARB) and as such is subject to minimum capital adequacy standards. Quarterly disclosures are prepared in accordance with the Basel Committee on Banking Supervision (BCBS)'s revised pillar 3 disclosure requirements, and the SARB Directive 1 of 2019 issued in terms of section 6(6) of the Banks Act No. 94 of 1990 and Regulation 43(1) of the regulations relating to banks.

Measures of exposures and other metrics disclosed in this report may not be based on International Financial Reporting Standards (IFRS), may not be directly comparable to measures reported in financial statements, and may not be comparable to similar measures used by other companies or branches. These disclosures are not required to be, and have not been, audited by our independent auditors.

Definition of Risk-Weighted Assets

The risk weights used in the calculation of RWAs reflect an assessment of the riskiness of our assets and exposures. These risk weights are based on predetermined levels set by regulators. The relationship between available capital and capital requirements can be expressed in the form of a capital ratio.

Regulatory Development

The branch's businesses are subject to extensive regulation and supervision. Regulations have been adopted or are being considered by regulators and policy-makers worldwide.

Given that many of the new and proposed rules are highly complex, the full impact of regulatory reform will not be known until the rules are implemented and market practices develop under final South African regulations.

GOLDMAN SACHS INTERNATIONAL BANK JOHANNESBURG BRANCH Pillar 3 Disclosures

In August and September 2022, the PA published initial proposed requirements implementing the remaining components of the Basel III regulatory reforms. The proposed rules set a floor on internally developed capital requirements at a percentage of the capital requirements under the standardised approach (known as the "output floor"). They also revised the standardised and model-based approaches for credit risk, updated the leverage exposure measure definition for the leverage ratio and provided a new standardised approach for operational risk capital, as well as the revised framework for market risk and credit valuation adjustment (CVA) risk capital. In September 2024, the PA published a new consultation making additional amendments to the initial proposals, which are yet to be finalised. The proposed effective date is July 1, 2025.

Capital Framework

Capital Structure

For regulatory capital purposes, the total available capital has the following components:

- Common Equity Tier 1 capital (CET1), which is comprised of endowment capital from GSIB and retained earnings, after giving effect to deductions for disallowed items and other adjustments;
- Tier 1 capital which is comprised entirely of CET1 capital and no other qualifying capital instruments for GSIBJB; and
- Tier 2 capital, which is not currently applicable for GSIBJB.

Certain components of our regulatory capital are subject to regulatory limits and restrictions under the rules. In general, to qualify as Tier 1 or Tier 2 capital, an instrument must be fully paid and unsecured. A qualifying Tier 1 or Tier 2 capital instrument must also be subordinated to all senior indebtedness of the organisation.

Regulatory Capital Ratios

The risk-based capital requirements are expressed as capital ratios that compare measures of regulatory capital to RWAs. The CET1 ratio is calculated as CET1 divided by RWAs. The Tier 1 capital ratio is defined as Tier 1 capital divided by RWAs. The Total capital ratio is defined as Total capital divided by RWAs.

Compliance with Capital Requirements

As of March 31, 2025, the branch had capital levels in excess of its minimum regulatory capital requirements.

Key Prudential metrics and overview of RWA

The table below provides an overview of the branch's prudential regulatory position as measured by key regulatory metrics as at March 31, 2025, December 31, 2024, September 30, 2024, June 30, 2024 and March 31, 2024.

1. GSIBJB total capital ratio increased from 154.7% in December 2024 to 162.1% in March 2025 driven by decreased credit risk exposures.

RWAs are calculated based on measures of credit risk, market risk and operational risk. The table below represent a summary of the RWAs and capital requirements by type as at March 31, 2025 and December 31, 2024.

GSIBJB RWAs decreased from R724mn in December 2024 to R691mn in March 2025 driven by decreased credit risk exposures as a result of a decrease in cash balances.

Leverage Ratio

The branch is required to monitor and disclose its leverage ratio that compares Tier 1 capital to a measure of leverage exposure, defined as the sum of certain assets plus certain off-balance-sheet exposures, less Tier 1 capital deductions.

The table below presents information about the branch's leverage ratio.

Table 3: Summary Comparison of Accounting Assets vs Leverage Ratio Exposure (LR1)

GSIBJB average daily Liquidity coverage ratio (LCR) decreased from 2,762% in December 2024 to 2,728% in March 2025 driven by an increase in Total net cash outflows, partially offset by an increase in High quality liquid assets (HQLA). Total net cash outflows increase is driven by an increase in outflows related to derivative exposures and HQLA increase is driven by an increase in average treasury bills balance.

1. The quarterly average figures reported in the template above are based on 62 data points where applicable.

2. The ratio reported in this row is calculated as average of the daily LCR's for the period and may not equal the calculation of ratio using component amounts reported in rows "Total high quality liquid assets" and "Total net cash outflows".

GSIBJB Net stable funding ratio (NSFR) ratio increased from 505% in December 2024 to 519% in March 2025 driven by an increase in Available stable funding, partially offset by an increase in Required stable funding. Available stable funding increase was driven by an increase in other wholesale funding. Required stable funding increase was driven by an increase in other assets, partially offset by a decrease in deposits held at other institutions.

Cautionary Note on Forward-Looking Statements

We have included in these disclosures, and our management may make, statements that may constitute "forward-looking statements." Forward-looking statements are not historical facts or statements of current conditions, but instead represent only our beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside our control. These statements may relate to, among other things, (i) our future plans and results, (ii) the objectives and effectiveness of our risk management and liquidity policies, and (iii) the effect of changes to the regulations, and our future status, activities, or reporting under banking and financial regulation.

It is possible that our actual results and financial condition may differ, possibly materially, from the anticipated results and financial condition indicated in these forward-looking statements. The branch continues to analyse capital rules proposals and is subject to the risk that the final rules may differ from the proposed rules. In addition, important factors that could cause our actual results and financial condition to differ from those indicated in these statements include, among others, those discussed in "Risk Factors" in Part I, Item 1A of the firm's 2024 Form 10-K.
