Regulatory Ratios

The company's capital requirements are expressed as capital ratios prepared in accordance with the E.U. Fourth Capital Requirements Directive (CRD IV) and the E.U. Capital Requirements Regulation (CRR). Certain CRD IV and CRR rules are subject to final technical standards and clarifications. The capital, risk-weighted assets (RWAs) and estimated ratios are based on current interpretation, expectations and understanding of CRD IV and CRR, and may evolve as their interpretation and application is discussed with the company's regulators.

- The Common Equity Tier 1 (CET1) ratio is defined as CET1 capital divided by RWAs. The CET1 ratio under CRD IV was 12.0% as of December 31, 2018, compared with 12.5% as of September 30, 2018.
- The leverage ratio is defined as Tier 1 capital divided by a measure of leverage exposure, being the sum of certain assets plus certain off-balance-sheet exposures (which include a measure of derivatives, securities financing transactions, commitments and guarantees), less Tier 1 capital deductions. The company's leverage ratio under CRR was 4.4% as of December 31, 2018, compared with 4.2% as of September 30, 2018.

The regulatory ratios include the impact of the company's unaudited profit, after foreseeable charges and dividends, for the twelve months ended December 31, 2018. The ratios included in this report are preliminary estimates and may be revised in Group Inc.'s Annual Report on Form 10-K for the year ended December 31, 2018.
